ACS/ARES Corner

Frank Valdez KI6OQ is the Area 1 Emergency Coordinator

We are always looking for ACS members that would like to become Net Controllers. You will receive hands-on training at the Simi Valley PD (where we normally conduct the Weekly Net). It is both fun and at times challenging. You will gain valuable experience in running a controlled Net as well as becoming more than just familiar with the equipment in the Radio Room at the PD. If you would like to volunteer for this, just message Frank Valdez at frankki6oq@gmail.com.

If anyone is interested in how to set up your own packet station, RMS Winlink station, or a Mesh Node, contact Frank, he will point you in the right direction.

Barry K6ZA wants to remind everybody that they have options to check in with something other than a 2 meter handheld. The **80 meter net is Tuesday nights at 18:30 (6:30 PM) on 3.987 MHz.**

The **Area 1** (Simi Valley) net occurs Tuesdays. Generally it is just a brief check in, but usually some news about upcoming events is passed on.

The simplex net is on 145.510 at **6:45 PM**. The regular net is on the 146.805 (-, PL100) repeater at **7:00 PM. Stop by and say Hi.** You do not have to do anything other than check in to test out your simplex or repeater connection.

NOTE: Please be advised that we hold the Tue. **countywide** net at 19:30 (7:30PM) on the Sulphur Mountain WD6EBY repeater 145.200, minus 600 KHz offset, CTCSS of 127.3. Until further notice, this will be our standard frequency for countywide communications.

Visit vccomm.org for more updates.

In February, we have the upcoming Ventura Marathon. A full day out scattered from Ojai to Ventura at water stops, SAG support, start and finish lines, and various roving support.

When: Sunday, February 25th, 2024

Organizer: Burt Auerbach

Description: Major event requiring a large number of Ham volunteers

More Repeater Maintenance

While you all were having fun at the Christmas party, a few of us went for round 3 at Sulphur Mountain to help out Paul WD6EBY. This is the linked repeater system we use for the county wide ACS / ARES nets.

We took the dish antenna down (too much wind load), and swapped out a vertical antenna that had developed a fault.

Here is Paul prepping the new vertical antenna

Broken Crap by Eric KE6MLF

The big desktop computer I use to write the newsletter has died. Dang! The tiny red LED in the middle of the motherboard (near all the blue heatsinks) indicates "CPU Error". What does that mean? After much fussing, it is just time for a new motherboard and CPU. Case, power supply, RAM, hard drives, video card and other various bits can all be reused.

January 2024

But wait! The mobile radio use in my car has also decided to give me grief. The "Function" button on the front panel got stuck. That and powering up the radio is the method to reset and clear all memories. Dang! (again), Took it all apart. Cleaned the dust out of the buttons, got that working. Also need to replace the tiny front panel light bulbs. The bottom picture shows a strip of LEDs - got that are Red, Green, Blue - and can be set to make any color combination. Just have to figure out the right resistor values and mounting to get the display going again. Only scary bit is that the LCD display is connected via "zebra strip" Can be quite finicky to get properly connected. Yikes! Stay tuned to see if I can get it all back together and working.

The bright spot in my holidays was enough time to piece together this Lego space man. About 8 inches tall, with lights inside the helmet and world

January 2024

SSARC Marketplace

This section of the newsletter is for Simi Settler club members to post various used or previously owned items for sale that they may no longer have a need or use of. Please submit a brief description of the sale items (along with a photo if possible) and suggested price to Eric Oberg KE6MLK, the newsletter editor, at least two days before newsletter publication. It is suggested that a portion of each sale be donated to the SSARC treasury to help support the club's several activities. The term "OBO" means "Or Best Offer" and serves only as a starting point in negotiating a fair price.

.....

MEJ 335 MOBILE ANTENNA MAGNETIC MOUNT

This heavy-duty 5" diameter magnetic antenna mount uses a powerful 2.5 pound magnetic base for secure mounting on top of most vehicles. It features a standard 3/8-24 threaded receptacle for attaching various hamstick or other whip antennas as needed. The 9-1/2 ft. length of RG-58 cable has a standard PL-259 to HF end connector. Typical cost of this magnetic antenna mount from MEJ or DX Engineering is \$29.95.

Condition: Excellent Price: \$10 or OBO Contact: Mike Tweedy KV6I (805-231-9683)

AEA DM-1 DEVIATION METER

This AEA model DM-1 deviation meter can be used to adjust the maximum deviation levels on transceivers that allow adjustable frequency deviation settings for FM transmissions on 2m, 1.25m or 70 cm. Typically, for wideband audio FM on the 2 meter amateur band, this would be 5 kHz. For narrowband audio FM, this would be 2.5 kHz. For CTCSS sub-audible tones, this would typically be 1 kHz. Transceivers with excessive deviation can cause out-of-band signals (or "splatter") which can interfere with adjacent channel signals. A similar sale of this item was recently found on Ebay for \$65. The unit is powered by an internal 9-V battery and the AEA operating manual is included.

Condition Excellent Price \$10 or OBO Contact Mike Tweedy KV6I (805) 231-9683

January 2024

LAFAYETTE RADIO MODEL TE-50 TUBE TESTER

This portable tube tester from Lafayette Radio is perfect for testing vacuum tubes from classic radios and television receivers sold back in the day. It has eight tube sockets capable of testing standard Octal, Loctal, 7-pin miniature, 9-pin miniature types as well as 9- and 12-pin Compactron tubes and nuvistor tubes that were popular back in the 1950s and 1960s. Tests include leakage, shorts and tube emission (e.g. gain or μ measurements). The tester includes a slide-out chart drawer plus supplemental charts for newer-type tubes listing the required selector switch and slide switch settings for each tube under test including a test clip for testing tubes with high-voltage anode top caps such as those used for horizontal sweep circuits of earlier televisions. Similar Lafayette Model TE-50 Tube Testers are listed on E. Bay for \$99.99 or more.

Condition: Very Good Price: \$20 or OBO Contact: Mike Tweedy, KV6I (805-231-9683)

RADIO SHACK MODEL 15-1244 RF MODULATOR

This Radio Shack RF modulator can provide an NTSC type RF signal to older TVs or video monitors that require an analog signal as an input. The output is user-selectable for either channel 3 or channel 4 output and can provide 75 ohm or 1k ohm impedance. Input is AV video/video using standard phono-type plug cables. An RF coax jumper cable is provided.

Condition: Excellent Price: \$10 or OBO. Contact Mike Tweedy KV6T (805-231-9683)

GRAB BAG OF MISCELLANEOUS COMPONENTS

After recently cleaning out my closet, I came upon several components that I may have had thoughts of using over 20 years ago but unfortunately was not able to do so. I paid well over \$30 for these components back then but sadly, that did not occur so I am offering these components to any experimenter who would like to use them accordingly. These components are in their original packaging and have never been opened.

What I have is the following

- 1) RS P/N 274-246 1/8" 3-conductor phone jacks (Qty = 2)
- 2) RS P/N 274-245 3/32 Subminiature phone jack (Qty = 1)
- 3) RS P/N 272-1524 B pin LED amps (Qty = 2)
- 4) RS P/N 272-1092C .2 volt micro amps (Qty = 2)
- 5) RS P/N 273-1374 Audio isolation transformers (Qty = 2)
- 6) RS P/N 274-688B Five Position Terminal Strip (Qty=1)
- 7) RS P/N 270-235 Aluminum Project Enclosure (Qty=2)

Condition: Never Used Price: \$5 or OBO Contact: Mike Tweedy KV6I (805-23-9683)

January 2024

From Kevin, KD6UTC; I'm selling some of my HF equipment that I don't use. I would like to sell it as a bundle I hope this will be a good start kit for one of our members new to HF

SSARC Marketplace HF bundle

- COM 7300 with original box
- LDG Electronics Z-100P LJS - Automatic Antenna Tuner
- LDG RBA 4:1 Balun
- LDG RBA 1:1 Balun
- (2) MFJ HAM sticks 20M
- (2) MFJ HAM sticks 40M
- (2) Mirror/Pipe Antenna Mounts
- MFJ Double T Pipe Mount

Condition: Excellent Price: \$850 **NOW REDUCED to \$750**

From Glenn WA6GNB

GrandStream # 1620/1625 telephone for sale New still in the original box Compatible with our MESH system \$30.00 Contact Glen at gnb2112@yahoo.com

From Sergey KT4UFA - ut4ufa@gmail.com

AC-DC switching power supply.

Input 115V AC 50-60Hz

Output 12V DC 5.4 Amps

It has small trimmer to fine adjust output voltage

Dimensions 7.5*5*2.5

Free, self pickup.

January 2024

Frequency counter, Datascan C1400

Sensitivity 50 mVpp

The input BNC connectors are a little bit rusty, need cleaning up

Internal battery is dead. was removed and needs replacement

To power up the device, on the back side present a connector for external power supply

I made calibration, but the frequency counter is equipped with simple crystal quartz, so accuracy and stability is not so good

Free, self pickup.

January 2024

Signal generator, Kronh-Hite model 5400A
 Fully analog.
 5 MHz.
 Ramp, Sine, Triangle, Square.
 \$30

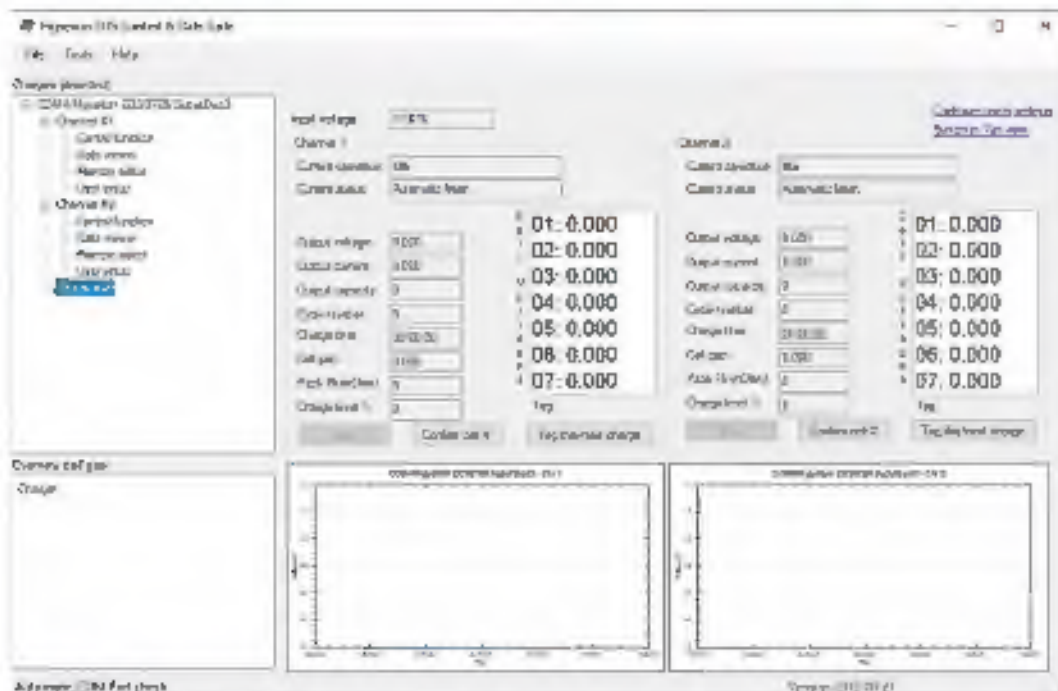

Frequency counter - Gold Star FC-2130U
 1.3 GHz
 3 input ports. Coupling, Attenuation, Filtering.
 Mathematical function.
 \$60

January 2024

+ PC control and monitor software.

\$150
